

*Myasthenia Gravis means muscle weakness.* It can be fatal; and affects all ages and all genders. We use a Rag Doll because the harder a sufferer of MG tries, the floppier they can become which is similar to a Rag Doll.

Please help us to support sufferers and their families. We need to raise the awareness of this little known disease by bringing its existence to the attention of Government, its various offices and to the public at large. We need **YOU** to support the aims of this campaign, in order to: -

- 1. Increase support from Government sources and similar bodies.
- 2. Raise MG profile throughout the medical community, both in the UK and Ireland.
- 3. Reduce the average time for diagnosis currently around 4/5 years.
- 4. Increase public awareness of this Disease.
